## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With respect to claim 1, lines 9 and 17, the term “reversible” appears to be improper and should be deleted.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Geister #3,758,891.

Geister, as recited in column 3, lines 17-23, and best seen in Figures 14-17, discloses a *stackable* (alternately received portions) foot assembly comprised of a base assembly 25 having floor engaging surface 21, 21' and first puzzle registry 26, 26', a middle assembly 25 having second puzzle registry 20, 20' and third puzzle registry 26, 26', and a foot support assembly 10 having fourth puzzle registry 20, 20' and foot engagement assembly 11, 12, 15.

***Allowable Subject Matter***

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The primary reason for the allowable subject matter of claims 2 and 3 is the inclusion of a foam spacer block member located between the ends foot support assembly and the ends of the middle assembly. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.

***Conclusion***

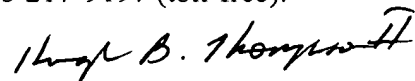

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dietzmann DE#3,507,741. De Carbon #2,899,685, Weighill #2,923,947, Kenworthy et al #3,454,965, Cramer #3,626,609, Weiss #3,735,980, Stewart #6,105,718, and Wojtkiewicz et al #6,964,634 are cited to teach stilt assemblies.
